Anyan's comments:
Flight high school episode 50! Please enjoy!

1. Europe's A330MRTT will be part of the Republic of Korea Air Force family. The A330MRTT in 2012 at Spain sheared off its refueling boom accidentally, which is to say the least quite an exotic accident, lol

2. I'm sure you've heard of the news that the F-16D won over the F-35A in a simulated dogfight. Even though it's been blown out of proportion thanks to the reporters looking for a scoop, the scenario was a close combat situation where the F-35's long range capabilities and sensors had no use. It's not really meaningful that the F-35 lost in this case. In addition, it was reported that the F-35A's canopy was too small compared to the pilot's helmet, and subsequently the pilot couldn't move his head around easily. There seems to have been a large penalty...

3. GoPro "selfie" videos taken from Russian and American aircraft have been spotted lately. The Russian demonstration team Swifts' GoPro videos are a must-see.

4. This is an episode about the relation between the B-52 and the Tu-95. The Tu-95 Bear is developed from an unauthorized reverse-engineering of the B-29, and is an upgrade from the Tu-4.
